

CELLEBRITE CERTIFIED TRAINING

APRIL 24-28, 2017

Hosted by Central Piedmont Community College

Merancas Campus, Huntersville, NC

Cellebrite Core Mobile Forensics

5 Days

&

Cellebrite Core Mobile Forensics

The Cellebrite Certified Mobile Examiners Course is designed for the intermediate and advanced investigator / digital forensic examiner. This 5-day course combines the curriculum from the Cellebrite Certified Operator (CCO) and the Cellebrite Certified Physical Analyst (CCPA) Courses providing the participant with an intense exposure to Cellebrite UFED, Physical Analyzer Software and all of the core competencies associated with the examination of mobile devices using Cellebrite's Tools and methodology. Students will achieve the CCO and CCPA certification if they take and pass a knowledge test and practical skills assessment with a score of 80% or better. The only way to earn these certifications is by taking the exam along with an associated course, there is no test out available.

Successful class completion results in a certificate of completion and demonstration of mastery of these concepts. This is also one of the prerequisites for students desiring to take the Cellebrite Certified Mobile Examiner (CCME) certification examination. Students considering the CCME Certification are required to complete the Cellebrite Mobile Forensic Fundamentals (CMFF) course, Cellebrite Certified Operator (CCO) course and the Cellebrite Certified Physical Analyst (CCPA) course.
