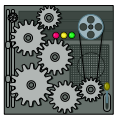
CLOCK HOUR/CREDIT HOUR CONVERSION



The determination of enrollment status (full, ¾, ½, or less) is, by Federal Regulations, different for the Computer-Integrated Machining Technology (D50210) (formerly Machining Technology – D50300) **program of study:**

This determination of enrollment status is different because the program has one or more courses that cannot be used toward a two-year degree program. Enrollment status determination for conversion programs involves totaling for each course the clock/contact hours a student takes each semester. **For Fall/Spring semesters, the total lecture and lab hours are multiplied by 16 then divided by 37.5** to obtain the converted credits. **For Summer semester, the total lecture and lab hours are multiplied by 8 then divided by 37.5.** The converted credits are then used to determine the enrollment status.
Refer to the Federal Student Handbook under Volume 2, School Eligibility-Chapter 2, on page 2-28

****SPECIAL NOTE: DO NOT ROUND UP WHEN TOTALING HOURS!***
