

PROCESS
EXCELLENCE
A FIVE SEMINAR SERIES

Share the Knowledge

Keep the momentum going!

Build a high powered Process Excellence team at your company. For a limited time, you can purchase a live recording of each Process Excellence seminar plus color copies of the PowerPoint presentations. This offer includes the keynote seminar presented by Dr. Jeffrey Liker, author of The Toyota Way. For more details see the reverse side of this flyer.

Seminar #1 - Process Excellence: A Journey Not a Destination

Dr. Jeffrey Liker

Noted author and professor Dr. Jeffrey Liker explains the culture and values that drove Toyota to be the dominant automotive company in the world. Many organizations now employ the standard Lean tools used by Toyota.

Seminar #2 – Creating Perfect Processes

Dr. Vinay Vasudev

This seminar introduces Six Sigma and process control in the Lean world. Many organizations pursue Six Sigma while others have followed the traditional Lean approach to process improvement. The most successful organizations have combined Lean and Six Sigma because they know a process cannot be lean with high variability. This seminar focuses on Six Sigma methodology and process control that are applicable in any organization or business model.

Seminar #3 – Process Improvement Tools: Part 1

Bob Olson

This seminar is the first of two seminars focusing on the process improvement tools. The content is targeted at companies starting the process improvement journey who want a better understanding of the basics. Organizations that have stalled on their process improvement journey will find reviewing the basics a good way to re-energize the team.

Seminar #4 - Process Improvement Tools: Part2

Nancy Bach

This seminar follows up on the Process Improvement Tools and focuses on Poka-Yoke, Pull and the Visual Workplace. This seminar concludes with a unique office simulation that demonstrates all the process improvement tools.

Seminar #5 - Process Improvement Metrics

Gary Klipp

This final seminar focuses on Lean Six Sigma metrics and how organizations can effectively align these metrics to drive process improvement. Lean Six Sigma breakthrough results are created by successfully completing projects that are aligned with business goals and impact high-level or satellite-level metrics. This seminar explores the alignment and management of metrics in a Lean Six Sigma organization from satellite-level business metrics to lower-level operational metrics.

Pricing (Includes shipping & handling)

	Set (1 DVD & 1 PP Book)	# of SETS	Additional PowerPoint Books	# of Additional Books	\$ TOTAL
