Electrical Engineering Technology Certificates (C40180)

The certificate listed below can be earned in the Electrical Engineering Technology (C40180) Program.

Admissions

High school diploma or equivalent is required. High school students preparing for an Engineering Technology program should complete courses in algebra, geometry, and advanced math. Skills and proficiencies should be developed in writing, computer literacy, and science.

CPCC placement tests are required in English and mathematics. Developmental Studies mathematics and English courses are available for students to build basic skills and knowledge.

A counseling/orientation appointment follows placement testing.

ELC 135 Electrical Machines I	2	2	0	0	3
ELN 132 Linear IC Applications	3	3	0	0	4
ELC 213 Instrumentation	3	3	0	0	4
ELN 260 Programmable Logic Controllers	3	3	0	0	4
Total Credit Hours					15

Electrical Engineering Technology Certificate with a Specialization in Advanced Electrical Systems (C40180-C3)

Major and Related Course Requirements

	Class	Lab	Hours Clinical	Work Exper.	Credits
ELN 133E Digital Electronics	3	3	0	0	4
ELC 136 Electrical Machines II	3	3	0	0	4
ELC 231 Electrical Power Systems	3	2	0	0	4
ELC 213 Instrumentation	3	2	0	0	4
Total Credit Hours					16

Electronics Engineering Technology (A40200)

The Electronic Engineering Technology curriculum prepares individuals to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems.

A broad-based core of courses, including basic electricity, solid-state fundamentals, digital concepts, and microprocessors, ensures the student will develop the skills necessary to perform entry-level tasks. Emphasis is placed on developing the student's ability to analyze and troubleshoot electronic systems.

Graduates should qualify for employment as engineering assistants or electronic technicians with job titles such as electronics engineering technician, field service technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Degree Awarded

The Associate in Applied Science Degree - Electronics Engineering Technology is awarded by the College upon completion of this program.

Admissions

- A high school diploma or equivalent is required. High school students preparing for an Engineering Technology program should complete courses in algebra, geometry, and advanced mathematics. Skills and proficiencies should be developed in writing, computer literacy and science.
- CPCC placement tests are required in English and mathematics. Developmental Studies mathematics and English courses are available for students to build basic skills and knowledge.
- A counseling/orientation appointment follows placement testing.
- Many courses have prerequisites or corequisites; check the Course Descriptions section for details.

Additional Information

Program Accreditation

The Electronics Engineering Technology program at Central Piedmont Community College is accredited by the Technology Accreditation Commission of the Accreditation Board for Engineering and Technology.

Notes

Electronics Engineering Technology involves the practical application of electrical and electronic fundamentals of design, fabrication, manufacturing, testing, repair and maintenance of electronic components, circuits, and systems. The electronics engineering technician is concerned with analog and digital circuitry, microprocessors, microcomputers, and their practical application in modern industrial settings.

The Electronics Engineering Technology curriculum provides a basic background in the practical application of both fundamental and specialized electronic principles. Courses are designed to present technical content in an order that provides students with progressive levels of job-related knowledge and skills. From fundamental electrical and electronic courses, students advance to electronic specialty courses that provide concentrated study in various fields of the electronic industry, including computer-electronics, microprocessors, systems maintenance, data communication, robotics, and printed circuit board layout and design using CAD.

The Computer/Electrical/Electronics Engineering Technolo-

gy laboratories are staffed during day and evening hours so that students may devote as much time as possible to laboratory assignments. These modern facilities include adequate equipment to support practical laboratory activity in all courses.

Students who do not take program-related courses for two consecutive semesters must re-enter the program under the Catalog in effect as the time of re-entry.

Students in Electronics Engineering Technology (A40200) program desiring to earn an additional degree in Computer Information Technology (A40160) or Electrical Engineering Technology (A40180), must meet the course requirements of the additional degree, and in the process complete a minimum of 12 unduplicated required or elective semester hours credit.

Contact Information

The Electronics Engineering Technology program is in the Information Technology Division. For more information, call 704.330.6479.
