

## **Mechanical Engineering Technology**

### **Program Educational Objectives**

1. Graduates will have knowledge and skills to perform at a technician level for regional employers.
2. Graduates will be employable in a field related to their program.
3. Employers will be satisfied with the performance and education of graduates and will be willing to employ future graduates.
4. Graduates will be able to accept increasing levels of responsibility by learning new skills and adapting to changing technology in the workplace.
5. Those graduates choosing to continue their education in a four-year engineering technology program will perform satisfactorily in such programs.
