

# CLOCK HOUR/CREDIT HOUR CONVERSION

The determination of enrollment status (full,  $\frac{3}{4}$ ,  $\frac{1}{2}$ , or less) is, by Federal Regulations, different for the Autobody Repair (D60100) program of study:

This determination of enrollment status is different because the program has one or more courses that cannot be used toward a two-year degree program. Enrollment status determination for conversion programs involves totaling for each course the clock/contact hours a student takes each semester. **For Fall/Spring semesters, the total lecture and lab hours are multiplied by 16 then divided by 37.5 to obtain the converted credits. For Summer semester, the total lecture and lab hours are multiplied by 8 then divided by 37.5.** The converted credits are then used to determine the enrollment status. Refer to the Federal Student Handbook under Volume 2, School Eligibility-Chapter 2, on page 2-28

***\*SPECIAL NOTE: DO NOT ROUND UP WHEN TOTALING HOURS!***
