ACTIVote

An interactive student response system that transforms classroom dynamics

Promethean's ACTIVote system offers an unprecedented opportunity for instantaneous assessment of student understanding or opinion. Use of the hand-held ACTIVote devices adds impact to lessons by turning all students into active participants.

ACTIVote promotes group participation by stimulating group feedback during class discussion, spontaneous opinion gathering, and more formal tests. All students are motivated to take part because they really enjoy using the hand-held devices instead of pens and paper.

At any stage of the lesson, you can obtain instant feedback on your students' understanding, enabling you to change focus mid-lesson, address any misconceptions or review areas where students are struggling. ACTIVote gives you feedback from all of your students, not just the ones who always raise their hands.

Any question, with up to six possible answers, can be presented to your class via our ACTIVstudio software, and responses recorded and displayed. Supplied with sample questions, our Question Master Wizard makes it easy for teachers to prepare their own questions and add images.

ACTIVote communicates with your ACTIV board via radio frequency, which means there is no need to point the devices directly at the ACTIV board in order to participate.

- Students become engaged and retain more information from the lesson.
- Formative assessment becomes truly enjoyable.
- Teachers and students are provided with immediate feedback.
- Efficient assessment process reduces the need for marking papers.
- Even reluctant learners are motivated to respond.
- Responses can be anonymous if required, encouraging response from all students.

About Promethean

Promethean is dedicated to making a difference in our children's education. With over 450,000 school children in over 45 countries being taught using Promethean Collaborative Classroom solutions, we constantly strive to be at the forefront of research and development.

Promethean employees pride themselves on listening to the needs

of teachers and students in order to provide the highest quality educational solutions available. Key to our success is that we understand that your needs go far beyond the products themselves. We aim to build partnerships with our customers, offering free demonstrations of new products, professional development and a dedicated customer support team.

ACTIVote

Creating an ACTIVote Session

The following steps illustrate how to begin the assessment process by creating a flipchart containing lesson content, interactive activities, and assessment questions.

1. Determine the curriculum standard for which you would like to conduct assessment.
2. Develop questions for assessment using the Question Master Wizard from within the ACTIVstudio software.
3. Design your own interactive activities that would reinforce the concepts used in the lesson with ACTIVstudio's resources.
4. Develop pages in the flipchart to introduce the concepts being explored in the lesson.
5. Present content, allow students to contribute with interactive activities, and conduct your ACTIVote session to assess understanding.

Conducting an ACTIVote Session

1. Display assessment question on the ACTIV board.
2. Initiate student responses with the hand-held devices.
3. See results displayed in tabular or pie-chart format on the ACTIV board. (Results can even be exported to Microsoft Excel™.)

Features

The ACTIVote pack comes complete and ready to use with 32 hand-held voting devices and a radio frequency transceiver.

The latest radio frequency (RF) technology (915MHz) provides rapid result collection with no need for awkward pointing of the hand-held devices, allowing for discreet and reliable registering of opinion.

Questions created in the Question Master Wizard can be saved to a library for future use, saving preparation time and resources.

ACTIVote may be used in Ad-Hoc mode, eliminating the need to prepare questions beforehand.

Comes in a stylish, highly portable suitcase to make it easy to share between classrooms.

Use with just one networked computer.

Each voting device has 6 answer buttons and a registration key.

Powered by 3 x AAA alkaline batteries which typically have a life of 2 years and are easily replaceable by removing the security screw.

Overall dimensions of each pad are 3.4" x 2.7" x 1.4"
