**The OP & WT Crowder Construction Institute at CPCC offers a comprehensive set of programs, certificates, degrees, and opportunities to begin a career in any of the areas of construction.**

**Degrees:**
The purpose of the new associate’s degree in Construction Management Technologies is to respond to the demand in the construction industry for skilled managers. The curriculum is designed to prepare individuals for careers in the fields of residential and commercial construction management. It is a two-year program that covers extensive general education requirements along with courses in total safety performance, planning and scheduling, cost and productivity, human relations, blueprint reading and estimating along with professional construction supervision. Coursework will also include Spanish for the workplace along with co-op and intern work experience.

This degree is designed to provide the novice as well as the skilled trade person the opportunity to move into management from the following areas of specialization:

- HVAC
- Electrical
- Carpentry
- Plumbing
- Masonry

**Fast Track Carpentry Certificate**
In order to fulfill the workforce needs of the construction industry, we have developed a fast-track Carpentry Certificate within the Construction Management degree. This certificate requires a full-time commitment from the student that can be completed in one semester and consists of the following courses:

- Introduction to Carpentry
- Carpentry I
- Blueprint Reading for Construction

Graduates of the program will find employment in both commercial and residential construction. They should qualify for entry-level positions in the field of construction management.

**Programs:**

- Carpentry
- Plumbing
- Masonry
- Home Inspection
- Code Enforcement Training
- Construction Safety Training
- Apprenticeship Training

**Licensing:**

- Electrical Contractor Licensing
- Builder Contractor Licensing
- Commercial Drivers Licensing
- Construction Safety Training
- Apprenticeship Training

**Customized Training**
Training is also available for industry professionals who want customized group classes. CPCC’s Corporate Training Team can create customized training packages for groups, teams or organizations in the Construction fields and deliver that training on-site and on budget.

**Scholarships:**
Scholarships are provided through CPCC’s Foundation and the generosity of industries, businesses, professional organizations, civic clubs, and individuals. These include American Subcontractors Association of the Carolinas, the National Association of the Remodeling Industry, National Association of Women in Construction and others.

**Construction Management Academy**
CPCC offers opportunities for students in the Charlotte-Mecklenburg School system to start creating a career path in construction early! The Construction Management Academy gives students the solid foundation necessary to take them to a two year or four year program of higher education. Students who participate in this program may someday become general contractors, foremen, assistant superintendents or can go on to earn degrees in engineering or related fields.

**Excellent employment opportunities for construction managers are expected through 2014 because the number of job openings will exceed the number of qualified individuals seeking to enter the occupation. This situation is expected to continue even as college construction management programs expand to meet the current high demand for graduates.**

Dawne Posey-Orr, Glorry Contracting

“I’m interested in becoming either a project manager or in getting my Contractor’s license. I am already a Real Estate broker and I feel that the best way to serve clients or to help people is to know from the inside out.”

— Winifred McCollough
