Rethinking Community College Math: Collaboration to Enhance Student Success

April 24, 2015; 9 a.m. – 3 p.m.
Worrell Gym, CPCC Central Campus

Join CPCC’s Mathematics Division as we bring together experienced instructors from each of the three Math Education sectors to present a mathematics workshop designed to develop customized solutions that enhance student learning and outcomes in math courses.

During the event, attendees will:

- hear from keynote speaker Paul Nolting, Ph.D., who will discuss how to achieve math success in a technology-rich classroom
- participate in breakout sessions focusing on a variety of topics, such as:
  - the application of instructional strategies in the classroom
  - recent technology tools
  - how to best prepare undergraduates for the transition into STEM studies

We hope you take this opportunity to network and engage with us this spring!
