Rethinking Community College Math:
Collaboration to Enhance Student Success
April 29, 2016; 10 a.m. – 2 p.m.
Elizabeth Classroom Building, CPCC Central Campus

Join the Central Piedmont Community College Mathematics Division as we bring together high school math teachers, community college mathematics instructors and college and university mathematics professors for an informative math workshop designed to develop customized solutions that enhance student learning and outcomes in math courses.

This year’s event will feature submitted project ideas from last year’s conference, a keynote speaker who will discuss and share engagement strategies and complimentary lunch workshop focused on innovative mathematic concepts.

Attendees will have an opportunity to network, engage and participate in various topics such as:

• How are mathematics curricula and instructional strategies successfully applied in high school and university/college settings?
• What recent technology tools are being used?
• How can post-secondary instructors help provide meaningful mathematics-based research experiences for transition into advanced STEM studies?

We hope you can join us for this opportunity to network and engage this spring, April 29, 2016!
