

How to register for DMA courses: Three easy steps

1. Decide if you need to take a DMA course.

I need to take a DMA course if...

- ❑ The college-level course for my program of study requires that DMA course (View Course Mapping at www.cpsc.edu/math).
- ❑ I do not qualify for the Multiple Measures waiver.
- ❑ My NCDAP score for the DMA Module is less than 7.

The 4 DMA learning environments move from a teacher-directed to a learner-directed style.

In **learner-directed environments**, students establish goals, choose learning tools, work independently or in small groups, monitor learning progress, and seek extra help when needed.

2. Understand the various DMA learning environments.

3. Register for DMA courses.

- ❑ Register for courses in order. For instance, complete DMA 010 before taking DMA 020.
- ❑ Do NOT take more than one DMA course in a 4-week session.
- ❑ Note the description of the course listed in MyCollege or Schedule Builder to determine the type of class you signed up for.
