

**CENTRAL PIEDMONT COMMUNITY COLLEGE
OSHA'S HAZARDOUS COMMUNICATION STANDARD**

EXPOSURE CLASSIFICATION STATEMENT: STUDENT

The designated student is classified by Central Piedmont Community College as entering a program that puts them at risk for occupational exposure to hazardous materials and/or chemicals by virtue of performing assigned tasks, procedures, and job responsibilities/duties, while a student, as indicated by OSHA's Hazardous Communication Standard Part 1910.1200.

Students may be exposed to hazardous chemicals, such as, but not limited to: disinfecting agents, various materials utilized during all phases of patient treatment/care/testing, laboratory agents, chemotherapy agents, and compressed gases.

Students will be required to adhere to and follow OSHA's Hazardous Communication Standard, OSHA's General Safety Standard, NC State Laws, and Program protocols for working with chemicals that have been deemed potentially hazardous.

_____ was informed by Central Piedmont Community College on
(Student Name)

_____ that I am entering a program that will require me to perform job duties that have been
(Date)

determined to put myself at risk for occupational exposure to hazardous chemicals/agents. I further understand that hazardous chemicals by OSHA's definition means:

“Hazardous chemicals means any chemical which is a physical hazard or health hazard.”

“Physical hazard” means a chemical for which there is scientifically valid evidence that it is a combustible liquid, a compressed gas, explosive, flammable, an organic peroxide, an oxidizer, pyrophoric, unstable (reactive) or water-reactive.

“Health hazard” means a chemical for which there is statistically significant evidence based on at least one study conducted in accordance with established scientific principles that acute or chronic health effects may occur in exposed employees. The term “health hazard” includes chemicals which are carcinogens, toxic or highly toxic agents, reproductive toxins, irritants, corrosives, sensitizers, hepatotoxins, nephrotoxins, neurotoxins, agents which act on the hematopoietic system, and agents which damage the lungs, skin, eyes, or mucous membranes.
